

Module 01 Preview

KPI Audit & Account Health Foundations

This is a limited public preview. The full module content, facilitator notes, worksheet prompts, scoring logic, examples, and answer guides are intentionally withheld.

Learning Goal

Learners begin by understanding that customer success metrics are only useful when they connect to real customer outcomes. The module introduces the difference between activity, health, risk, value, and executive-ready insight.

Preview Concepts Only

Concept	Public Preview
Customer Outcome	What the customer is trying to accomplish and how success is recognized.
Health Signal	A behavior, trend, or relationship pattern that suggests account stability or risk.
Lagging KPI	A result that confirms what already happened.
Leading Indicator	An earlier sign that may predict renewal risk, adoption issues, or expansion potential.
Operating Rhythm	The cadence used to review signals, assign ownership, and act before problems harden.

What is not included in this public preview

- Full worksheet pages
- Scenario data
- Facilitator notes
- Account health scoring model
- Detailed examples and answer keys
- Capstone integration prompts

Portfolio Value

The preview is meant to verify the existence, quality, and professional framing of the curriculum while preserving the full intellectual property for private delivery, consulting, or formal training use.
